Experience

FactSet Research Systems July 2022 – Present
Software Engineer III *New York, NY*

- Contributed to the development of a unified GenAI testing layer and experimentation toolkit for Mercury (FactSet AI), automating evaluation of 45K+ model responses per month with LLM-as-a-judge and golden answers
- Monitored distributed compute clusters during on-call rotations, using Grafana dashboards to identify anomalies and resolve issues, reducing incident resolution time by 30% through resource terminations and adjustments
- Engineered full stack components using Angular and C# to provide data insurance and integrity through data source cross-checking for financial data through FactSet's data integrity testing platform called Test Manager
- Constructed a notification service with serviceable endpoints for in-house teams to use to send notifications through emails, opsgenie pings, and support tickets; over 150K+ requests have been processed and sent to stakeholders
- Revamped stored procedures of Jupyter Notebook data integrity test runs to speed up retrieval cross-checked data from different selected data environments and test runs; improved efficiency by 35% within two weeks of release
- Developed a quality assurance (QA) automation system using typescript and Playwright for the Test Manager web application to streamline efficiency for releasing new features and products; decreased QA cycle time by 75%

New York University Information Technology Mar. 2020 – Dec. 2021
Student Technology Assistant *New York, NY*

- Resolved 500+ client support tickets related to remote technology issues, including troubleshooting software
- Developed a Python script to organize tickets by metadata, enabling faster lookup and efficiency for workers

Fundstrat Global Advisors June 2020 – Aug. 2020
Fullstack Engineering Intern *New York, NY*

- Redesigned FundStrat's website content architecture and navigation system using the Tailwind CSS framework, enhancing user experience and increasing site engagement by over 200% over one month after initial release
- Created wireframes in Figma to deliver UI/UX design proposals, presenting solutions directly to the CTO

Projects

Sonder, Agentic AI Trip Planner | *Next.js, Vercel AI SDK, Supabase, Three.js* Nov. 2025 – Present

- Built an SSE-streaming agent over a provider-agnostic LLM registry (Claude, ChatGPT, Gemini) with function-calling tools for structured itinerary extraction, place retrieval, and UI state mutation, backed by a Postgres place cache with 30-day TTL to cut Google Places API spend and tail latency on repeated queries

Lease Abstraction WebApp | *sentence-transformers, ChromaDB, Ollama* Jul. 2025 – Present

- A modernized web application utilizing Machine Learning and Natural Language Processing to abstract key details such as rent, term, and addresses from leasing forms to simplify the leasing process for both renters and landlords

EZSTOX, HackUVA Domain.com Sponsored Award | *Javascript, HTML/CSS, AJAX* Mar. 2018

- Developed a stock market analytical web application that implements various metrics to analyze investments

EyeMove, PilotDC 2015 "Most Innovative" Project | *Python, win32 API, OpenCV* Feb. 2015

- Moves mouse cursor based on where user is looking on the screen; left/right clicks based on left/right blinks
- With win32 API and OpenCV, the script loads two HAAR classifiers for the face and eyes to determine offsets from center screen; this allows for identification of eye movement and blinks that align with cursor movement and clicks

Education

New York University, Leonard N. Stern School of Business Sep. 2018 – Dec. 2021
Bachelor of Science in Business (Finance), Bachelor of Arts in Computer Science *New York, NY*
Relevant Coursework: Multivariate Regression, Statistical Analysis, Computer Systems Architecture, Data Structures, Discrete Math, Foundations of Finance, Basic Algorithms, Data Management, Parallel Computing

Technical Skills

Languages: Java, Python, C/C#, SQL, JavaScript, Typescript, HTML/CSS
Certifications, Tools, Frameworks, Libraries: AWS Cloud Practitioner, Git, Flask, FastAPI, Redis Queue, RedGate, React, Vue, Node.js, Postgres, Microsoft SQL Server, NumPy, pandas, Matplotlib, Jupyter, Playwright
Design/Visual: Figma, Lucidchart, Photoshop, Lightroom, Premiere Pro, After Effects, DaVinci Resolve
